Biomedical Engineering and Computational Intelligence

Proceedings of The World Thematic Conference—Biomedical Engineering and Computational Intelligence, BIOCOM 2018

Series: Lecture Notes in Computational Vision and Biomechanics

- Reports on cutting-edge intelligent methods applied to biomedical engineering
- Describes intelligent methods for application in disease diagnosis and prediction
- Reports on new ontology models for biology and biochemistry

This book reports on timely research at the interface between biomedical engineering and intelligence technologies applied to biology and healthcare. It covers cutting-edge methods applied to biomechanics and robotics, EEG time series analysis, blood glucose prediction models, among others. It includes ten chapters, which were selected upon a rigorous peer-review process and presented at the 1st World Thematic Conference - Biomedical Engineering and Computational Intelligence, BIOCOM 2018, held in London, United Kingdom, during October 30–31, 2018.
