Introduction

Method

The data shown in this document refers to scientific papers authored by teachers (including guest teachers), researchers (including those with grants), non-academic staff and students of the U.Porto, and the source used is the *Institute for Scientific Information - Web of Science* (ISI – WoS).

For each year of indexation, the search was conducted by address (places with a U.Porto campus: Porto, Gaia, Matosinhos and Vila do Conde), in the databases Science Citation Index Expanded, Social Sciences Citation Index, Arts and Humanities Citation Index, regardless of the year of publication, language and type of document. For the 2008 indexation, search was conducted on 5 January 2009; for 2003 to 2007, it was re-done on 15 January 2009.

For each reference found, we checked its connection to the U.Porto: either explicit or because there are references to Faculties, department(s), service(s) or R&D units of the U.Porto. For the scientific papers affiliated to hospitals, we checked if the author(s) is/are also member(s) of the U.Porto and, in this case, they were accounted for in the respective Faculties.

Scientific papers affiliated in more than one Faculty were accounted for in each respective faculty.

The U.Porto total corresponds to the actual total; it is different from the sum of the Faculties because the scientific papers with double or multiple affiliation were accounted for in the Faculties involved, and because it also includes scientific papers from Research Units for which we were not able to establish the connection of the author to a Faculty.

Definitions

“U.Porto with proper affiliation” means that the references are found with the search query: *address* = (“Univ Porto” or “Univ Oporto”) and *country* = “Portugal”.

“U.Porto without proper affiliation” means that the scientific papers are authored by a member of the University, but they are not found with the search query: *address* = (“Univ Porto” or “Univ Oporto”) and *country* = “Portugal”.

The **scientific papers per FTE doctorate ratio** (FTE = full time equivalent) **up to 2007** (inclusive) is obtained by dividing the number of scientific papers indexed in the year by the number of FTE of the categories Full Professor, Associate Professor, Assistant Professor and Researchers, as at 31 December of the previous year. **For 2008**, it is obtained by dividing the number of scientific papers indexed by the number of FTE teachers and researchers with a doctorate degree, as at 31 December 2007.

The **Hirsch index**, *h*, means that on the date when the search was done, there were *h* scientific papers with at least *h* citations in the Web of Science. The citations of scientific papers indexed between 2004 and 2007 were accounted for on 15 January 2009; the citations of scientific papers indexed in 2008 were accounted for on 5 January 2009.

Table 1 and chart 1 show the growth between 1999 and 2008 of the national and the U.Porto scientific production.

The scientific production of the U.Porto represents 20% of the national total in the past ten years, with an average growth rate of 14% in the past three years.

Table 1: ISI – WoS scientific papers, growth 1999-2008 – Portugal and U.Porto

	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008
Portugal (1)	3 495	3 592	4 188	4 288	5 492	5 666	6 715	7 738	7 699	9 742

Table 2 shows the scientific papers with and without proper affiliation for the U.Porto total and for the years 1999-2008. In these past ten years, 25% of the scientific papers from the U.Porto are not properly affiliated. As such, there are not acknowledged by the searches based on the Country and the University of Porto.

Table 2: ISI – WoS scientific papers, growth 1999-2008 – U.Porto

	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008

Chart 2: Ratio scientific paper/FTE PhD (31 Dec of the previous year), growth 2004-2008, per Faculty

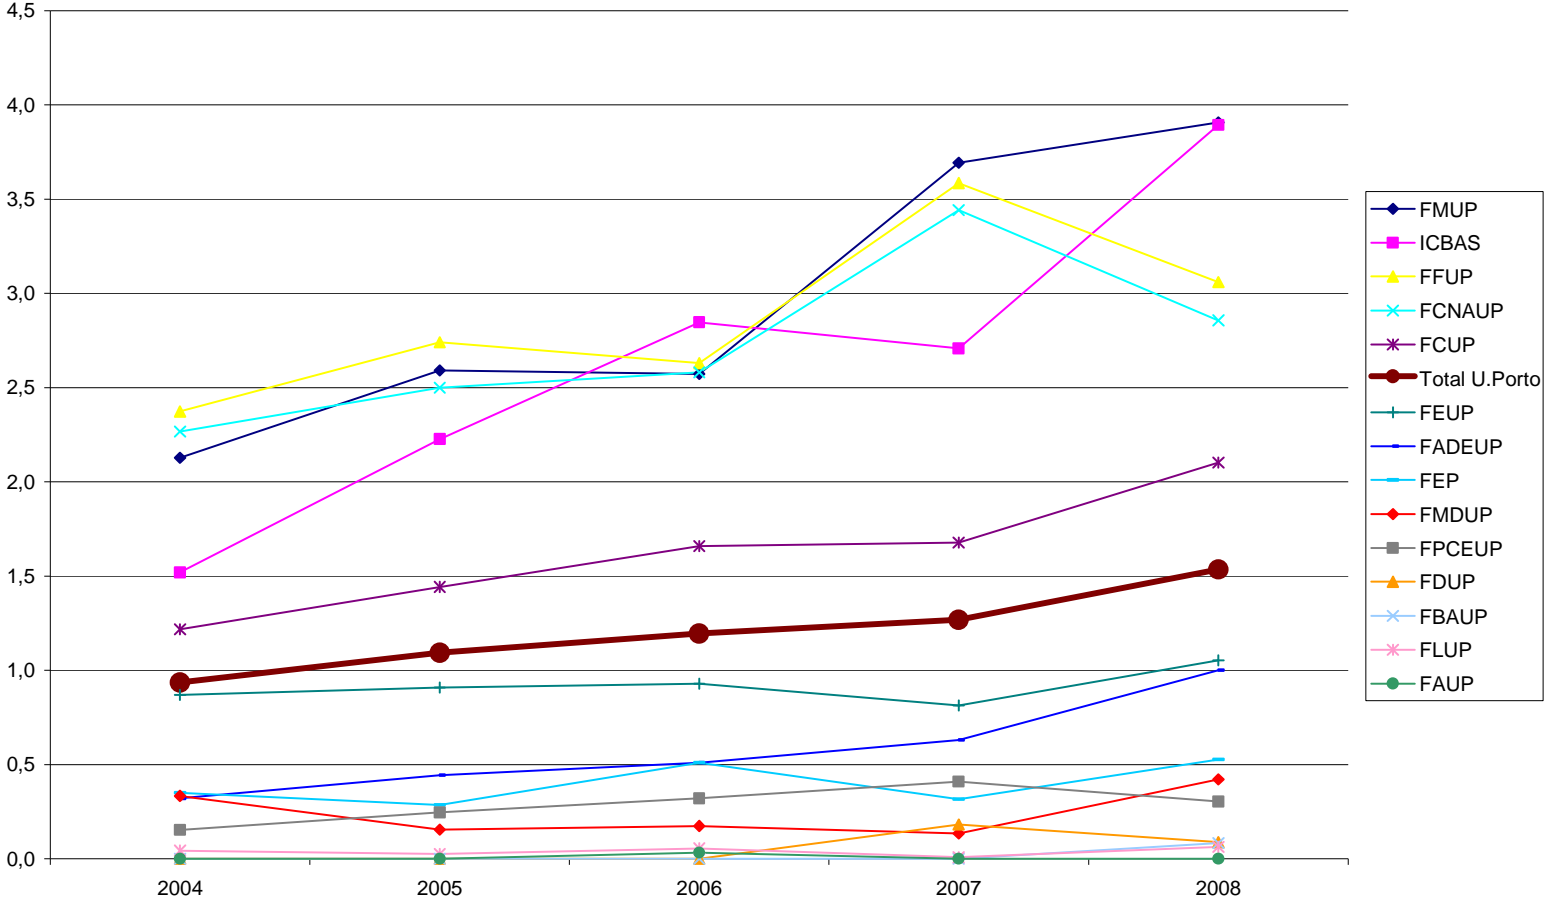

Table 6 shows the number of scientific papers indexed in 2008, per Faculty, mentioning those that are not properly affiliated and their percentage in the Faculty's total.

Note that the *h* Index = 10, in other words, of the 2 080 scientific papers from the U.Porto indexed in 2008, ten had already at least 10 citations on 5 January 2009.

Table 6: ISI – WoS scientific papers, indexed in 2008, per Faculty
