Title (Capital letters)      Type of contribution (*circle*) E **P** T  
 M/81: A method enabling adolescents to develop an awareness  
 of certain determinants of their vocational preferences.

Author (s), institution, city, country  
 Félix Neto; Teresa Freire; Faculdade de Psicologia e de Ciências  
 da Educação, Porto, Portugal

This practical presents and illustrates a technique designed to help adolescents and young adults become aware of: a) the relations between certain classic determinants (prestige, salary, career prospects...) and their vocational preference system; b) the strong and weak points in their information systems; c) the internal structure of their occupational representations. It can be seen as an application of Social Judgement Theory. This technique has been very useful to teachers and psychologists. It can be used alone or in combination with psychological interest inventories. It can also be used to promote discussion and better understanding between parents and children as regards vocational and career choice.

## TEACHERS' SELF EFFICACY PERCEPTIONS

Maria Conceição Nogueira, Univ. Minho, Portugal

This study aims to evaluate the relationship between secondary school teachers' self efficacy perceptions and the problems type and frequencies experience during their teaching practice. The sample school is made of 163 school teachers of several teaching subjects. The data are analysed by sex and teaching experience. Based on the results of this study the author argues for the need to improve teacher's self efficacy.
