A Universidade do Porto no ShanghaiRanking's Global Ranking of Sport Science Schools and Departments 2022

<https://www.shanghairanking.com/rankings/grsssd/2022>

1. Metodologia do ShanghaiRanking's Global Ranking of Sport Science Schools and Departments

1.1. Selection of Universities

Candidate universities are selected based on two criteria. First, the candidate should either be a sports university or have sport-related unit(s). Second, the sports university or sport-related unit(s) should have published a certain number of papers recorded in the Web of Science for the past five years (actively engaging in research). In total, 460 universities with their 516 sport-related units are selected and ranked.

2. Indicators and Weights

Universities are ranked by several indicators of academic or research performance, including papers indexed in Web of Science, total citations, citations per paper, papers published in the top 25% journals, and the percentage of internationally collaborated papers. For each indicator, the highest scoring institution is assigned a score of 100, and other institutions are calculated as a percentage of the top score. Scores for each indicator are weighted as shown below to arrive at a final overall score for an institution.

In calculating the CPP score, the maximum CPP value is set as twice the average CPP for all institutions. If an institution's CPP is higher than the maximum value, its score on CPP will be assigned as 100.

Criteria	Indicator	Code	Weight
Research Output	Papers indexed in Web of Science	PUB	20%
Research Quality	Citations to papers	CIT	20%
	Citations per paper	CPP	30%
	Papers published in the top 25% journals	TOP	20%
International Collaboration	Percentage of papers with international co-authorship	IC	10%
Total			100%

3. Definition of Indicators

Indicators	Definition
PUB	PUB refers to the total number of papers indexed in the Web of Science between 2017 and 2021. Both 'Article' and 'Review' typed publications are considered.
CIT	CIT refers to the total number of citations received between 2017 and 2021 to papers published by a n institution between 2017 and 2021.
CPP	CPP is citations per paper between 2017 and 2021 and the average number of CPP is used for the ranking.
TOP	TOP is the number of papers published in the top 25% of journals between 2017 and 2021. The top 25% of journals have an impact factor in the top 25% of the Journal Citation Report, 2021.
IC	IC refers to the percentage of internationally collaborated papers to all papers.
